# Trailer Units

■ Mobilized Power For All Jobs

## ERH1 TRAILER UNIT

The ERH1 Trailer Unit is an engine powered unit with an attached pit pump. This unit can pump from:

- 500 GPM @ 30' of head to
- 1000 GPM @ 38' of head

Fire departments can lift the hydraulic pump over bridge rails or into rivers & lakes to pump water to tanker trucks in minutes.

Sewer departments can use the same unit to pump out flooded manholes.

*The ERH2 Trailer Unit packs up nicely for easy transportation to any location.*

## ERH2 TRAILER UNIT

The ERH2 Trailer Unit has a hydraulic high rise boom that allows you to put your pit pump in hard to reach locations more easily.

This trailer unit also comes with hydraulic down riggers to allow for stability when the boom is fully extended.

The whole unit is run off of a Honda gas engine so no need to worry about bringing extra equipment. This unit has everything you need.
